

Personal advice on finding a career in industry and career opportunity in Saint Gobain

Dr. Huixing Zhang R&D Project Manager, I2 Innovation Incubator, Saint Gobain Research (SGR) Germany, Herzogenrath, Germany

Abstract:

The different needs of R&D work in industry and academy determines the different working scope and styles etc. The presentation is based on personal experience on finding a career in industry as international PhD student in Germany and aim to answer the questions for career path of beginners in the industry. The career path design begins with the self-analysis of current professional competence and desired job.

The first part of presentation is focused on following points for finding a job in industry:

- Gap analysis of desired job and current competence
- How you can prepare yourself during PhD phase
- Self-marketing
- Tips for job interview

The second part is introduction of Saint Gobain Research Germany in terms of research areas and entry level career opportunities etc.
